-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 6/2/04 Response.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

DETAILED ACTION

1. The Applicants' response filed on June 2, 2004 was received.

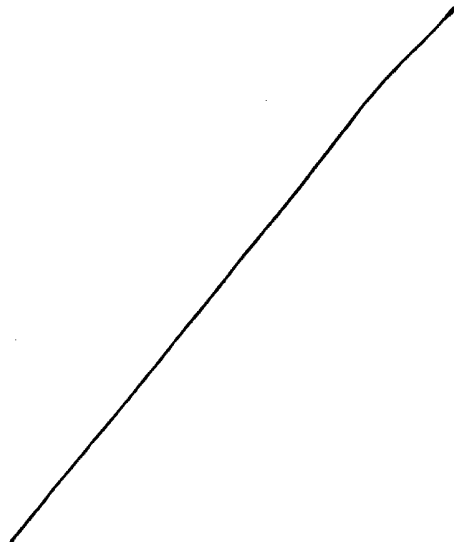

Specification

2. The disclosure is objected to because of the following informalities:

It is noted that the left halves of Tables 1-3 are missing. Furthermore, it is confusing that the footnote indicates that there are totally 31 pages. However, the specification appears to have only 22 pages (ending with paragraph [0047]). Applicants are advised to clarify this.

Appropriate correction is required.

3. The text of those sections of Title 35, U.S. code not included in this action can be found in a prior Office Action (Paper No. 0304).

Claim Rejections - 35 USC § 103

4. Rejections of Claims 1-32 under 35 USC 103(a) as being unpatentable are maintained because the rejection is adequately set forth in paragraphs 2-4 of Paper No. 0304. Applicant's arguments have been fully considered but they are not persuasive. The focus argument related to the core patentability is discussed below. It is noted that as pointed out by Applicants, there is a typographical error in line 1 of paragraph 4 in the previous Office action. The claim rejected should be Claim 31, not Claim 32.

Applicants primarily argue that a) there is an unexpected result of the use of a high molecular weight polyamide (i.e., 82,025) as indicated in Examples of the present invention (Remarks, page 10, second paragraph and page 11, second and third paragraph); b) "the teaching of Krevelen and Bueche are primary relevant to single polymer systems as opposed to multi-component blends. it is not clear to what extent the teachings of Krevelen and Bueche may be reasonably applied to multi-component blends." (Remarks, page 10, last paragraph to page 11, first paragraph).

With respect to a), Applicants should notice that the criticality of the molecular weight is shown in the Examples is the high molecular weight of 82,025 as compared to the low molecular weight of 62,593. Given the relative narrow range of the molecular weight difference between the high and low molecular weights, the disclosure does not show the criticality of any molecular weight between 82,025 and 62,593.

With respect to b), although Krevelen and Bueche are silent on multi-component blends, Applicants should notice that the comparison made is between a multi-component blend with a high molecular weight polyamide and a similar multi-component blend, however, with a low molecular weight polyamide. Therefore, whatever argument of single polymer system vs. multi-component blend should equally affect the aforementioned two multi-component blends to be compared.

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the

Art Unit: 1712

THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kuo-Liang Peng whose telephone number is (571) 272-1091. The examiner can normally be reached on Monday-Friday from 8:30 AM to 5:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Randy Gulakowski, can be reached on (571) 272-1302. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
